QuikRuler II

A Powerful Application for Palm OS™ Handhelds Supporting Digitizing and Measurement for Estimating TakeOffs

GTCO presents QuikRuler II for Palm™ handheld computers. Now, at the job site or in the office, accurate takeoffs are no further away than the palm of your hand. When used with a GTCO Roll-Up II™ Digitizer, the QuikRuler II™ provides a precise, lightweight system for measuring plans up to 36 inches x 48 inches in size.

The QuikRuler II software provides users with the capability of measuring irregular areas, calculating perimeters, measuring length segments and performing counts in both English and Metric scales. Now, it's a snap to perform takeoffs. But, you can also store the information on the Palm handheld and synchronize it to your desktop by performing the Palm HotSync™ feature. And, you can add QuikRuler II measurement capabilities to the other convenience features provided by the Palm handheld, such as calendars, phone lists and email.

Want to get your hands on the best estimating tool since the eraser? Call your local GTCO reseller or 800-344-4723 to speak to a GTCO sales representative.
