CARPINTERIA, Calif. and ATLANTA, July 10, 2018 /PRNewswire/ -- Procore Technologies, Inc., a leading provider of cloud-based applications for construction, today announced a partnership with Sage (FTSE: SGE), a market leader in construction accounting software. The partnership will allow Procore and Sage to deepen their existing relationship and strengthen the value of the current Sage 300 Construction & Real Estate (CRE) integration.

With the partnership in place, Procore, alongside our joint development partner [hh2 Cloud Services](#), can announce that highly requested features such as Prime Contracts and Prime Contract Change Orders are currently in beta, with the intent to release this functionality in the near future. The availability of the new features will round out the current integration feature set, which includes Cost Types, Estimates, and Subcontracts. These features work to sync the Procore Construction Financials tools with Sage 300 CRE to provide project and accounting teams access to the data they need to be more collaborative and efficient.

The companies have also committed to providing the market with another highly requested integration between Procore and Sage 100 Contractor. Plans to provide the integration are currently underway.

"This partnership is all about helping improve the lives of construction professionals who rely on Procore and Sage 300 CRE to do their jobs. With hundreds of customers already benefiting from the current integration, we have a real opportunity now to deliver the best solution possible to the industry," said Paul Lyandres, Executive Vice President, Strategy & Corporate Development, Procore.

"We're excited to deepen our existing relationship with Procore, and believe that aligning our efforts to better serve the construction industry will allow us to provide a better experience for both of our customers," said Jon Witty, Vice President & General Manager at Sage Construction & Real Estate.

Additional information regarding the current Sage 300 CRE integration for Procore is available [here](#).

About Sage

Sage (FTSE: SGE) is the global market leader for technology that helps businesses of all sizes manage everything from money to people – whether they're a start-up, scale-up or enterprise. We do this through Sage Business Cloud - the one and only business management solution that customers will ever need, comprising Accounting, Financials, Enterprise Management, People & Payroll and Payments & Banking.

Our mission is to free business builders from the burden of admin, so they can spend more time doing what they love – and we do that every day for three million customers across 23 countries, through our 13,000 colleagues and a network of accountants and partners. We are committed to doing business the right way, and giving back to our communities through Sage Foundation. Find out more at www.sage.com/en-us.
