

Sage 300 CRE Supported versions for year-end 2018

For year-end 2018, Sage is supporting versions 17 and 18 of Sage 300 Construction and Real Estate. Year-end updates for these versions will be available in December.

If you are currently on version 16.1 or earlier, we encourage you to upgrade to a supported version before your 2018 tax forms are due. Review the system requirements before upgrading:
